# API Testing for Agile Teams

The Agile Testing Solution for Teams

API Fortress is a continuous testing platform for APIs— which are the backbone of your websites and mobile applications.
With API Fortress, entire teams and departments can work together on a single platform, without disrupting their existing workflows. This allows for acceleration in deliveries, cross department transparency, elimination of bottlenecks, and a reduction in risk when delivering APIs.

Standardize agile API testing while simplifying distributed collaboration across your teams.

Remove the silo and collaborate.

Integrate With Your Existing Toolchain and Workflows

Our platform is powered by APIs, allowing for seamless integration with your existing version control systems, test case managers, CI platforms, ticketing systems, and notification methods.
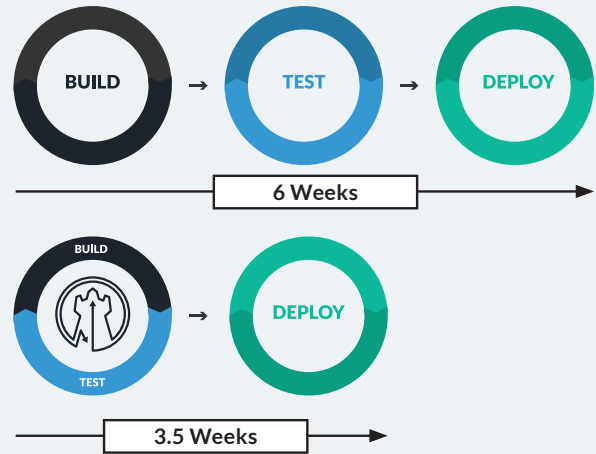

"[With API Fortress] a 5-week test cycle has been reduced to three weeks. The 35-40% reduction in API testing cycles comes from the ability to melt silos and centralize API testing on a single platform - pivotal for a distributed, global organization. Development updates no longer cause testing bottlenecks: with centralized API testing, it is possible to rapidly update microservices and tests across the organization."

-Sander Rensen, Solution PaaS Lead at Capgemini

Accelerate Releases with Parallel Development and Testing

Shift functional and performance testing left to achieve optimal speed and quality.

API mocking unlocks working in parallel, and accelerates deployments

BUILD → TEST → DEPLOY

6 Weeks

BUILD / TEST → DEPLOY

3.5 Weeks

API Fortress Integrations

Jenkins   Bitbucket   GitHub   CI/CD

Bamboo   TRICENTIS qTest   Zephyr™   Jira Software

Travis CI   Visual Studio Team Foundation Server   TestRail   slack

What Does It All Mean?

APIs are at the core of how companies are innovating today. They deserve the same level of testing that websites and mobile applications get. With API Fortress, you can automate that testing in a standardized manner across your organization.

About Us

API Fortress is a continuous testing platform for APIs that helps organizations accelerate releases while decreasing risk. Shift left with our automated platform, and unify developers and test engineers on a standardized testing strategy. Integrate with your existing version control and CI/CD platforms to streamline workflows. Learn how enterprises are transforming their API programs with continuous testing at
